

IncidentShare

IncidentShare is a powerful SaaS platform designed to simplify the way organizations share, collaborate, manage, and archive incident-related video, media and documents.

From private security applications to law enforcement and military, IncidentShare adapts to your terminology and workflows—whether you call them Cases, Action Reports, or simply Incidents.

User-friendly, browser-based interface

- Cloud-hosted
- Accessible from anywhere globally

Multimedia-first

- Optimized for video-centric workflows
- Instant playback of surveillance video footage
- Trim, annotate, and comment with ease
- Extract meaningful insights faster

Incident-centric design

- Each Incident acts as a centralized record containing all related videos, images, documents, and notes
- Designed to be flexible for different industries and naming conventions
- Examples of Incidents:
 - Cases in law enforcement
 - Action Reports in military and defense
 - Claims in insurance

Seamless collaboration

- Invite internal and external stakeholders with customizable permissions at no extra cost
- Facilitate hassle-free communication
- Secure file sharing with audit logs
- Review and approval workflows built-in
- Time-based comments overlayed on video
- Frame-specific, graphical video annotations

Designed for integration

Open APIs and watch folder for seamless integration:

- Video Management Systems (VMS)
- Digital Evidence Management Systems (DEMS)
- Record Management Systems (RMS)
- AI-based analytics of Incidents
- Versatile compatibility with on-premises and cloud systems

Pricing

- \$120/month per administrative user
- \$65/month per Incident creator
- Unlimited internal and external collaboration
